

Australian Standard[®]

Automatic fire sprinkler systems

Part 10: Approval documentation

This Australian Standard was prepared by Committee FP/4, Automatic Sprinkler Installations. It was approved on behalf of the Council of Standards Australia on 6 March 1995 and published on 5 June 1995.

The following interests are represented on Committee FP/4:

Asset Services—Department of Administrative Services

Australian Building Codes Board

Australian Chamber of Commerce and Industry

Australian Chamber of Manufactures

Australian Fire Authorities Council

Australian Water and Sewerage Authorities

Commonwealth Fire Board

CSIRO—Division of Building, Construction and Engineering

Department of Defence

Fire Protection Industry Association of Australia

Institution of Engineers, Australia

Insurance Council of Australia

Master Plumbers and Mechanical Services Association of Victoria

Melbourne Water

New Zealand Fire Equipment Association

Telecom Australia

Testing Interests

The Association of Consulting Engineers, Australia

Review of Australian Standards. *To keep abreast of progress in industry, Australian Standards are subject to periodic review and are kept up to date by the issue of amendments or new editions as necessary. It is important therefore that Standards users ensure that they are in possession of the latest edition, and any amendments thereto.*

Full details of all Australian Standards and related publications will be found in the Standards Australia Catalogue of Publications; this information is supplemented each month by the magazine 'The Australian Standard', which subscribing members receive, and which gives details of new publications, new editions and amendments, and of withdrawn Standards.

Suggestions for improvements to Australian Standards, addressed to the head office of Standards Australia, are welcomed. Notification of any inaccuracy or ambiguity found in an Australian Standard should be made without delay in order that the matter may be investigated and appropriate action taken.

This standard was issued in draft form for comment as DR 92189.

PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee on Automatic Sprinkler Installations FP/4 to supersede in part AS 2118—1982, *SAA Code for Automatic Fire Sprinkler Systems*.

This Standard is the result of a consensus among representatives on the joint committee to produce it as an Australian Standard.

The revisions to AS 2118 have included Standards Australia's requirements to keep product and installation Standards separate. When complete the series will comprise:

AS

- 2118 Automatic fire sprinkler systems
 - Part 1: Standard
 - Part 2: Wall wetting sprinklers (Drenchers)
 - Part 3: Deluge
 - Part 4: Residential
 - Part 5: Domestic
 - Part 6: Combined sprinkler and hydrant
 - Part 9: Piping support and installation
 - Part 10: Approval documentation
- 4118 Fire sprinkler systems
 - Part 1.1: Components—Sprinklers and sprayers
 - Part 1.2: Components—Alarm valves (wet)
 - Part 1.3: Components—Water motor alarms
 - Part 1.4: Components—Valve monitors
 - Part 1.5: Components—Deluge and pre-action valves
 - Part 1.6: Components—Stop valves and non-return valves
 - Part 1.7: Components—Alarm valves (dry)
 - Part 1.8: Components—Pressure reducing valves
 - Part 1.9: Components—Accelerators and exhausters
 - Part 2.1: Piping—General

The terms 'normative' and 'informative' have been used in this Standard to define the application of the appendix to which they apply. A 'normative' appendix is an integral part of a Standard, whereas an 'informative' appendix is only for information and guidance.

© Copyright — STANDARDS AUSTRALIA

Users of Standards are reminded that copyright subsists in all Standards Australia publications and software. Except where the Copyright Act allows and except where provided for below no publications or software produced by Standards Australia may be reproduced, stored in a retrieval system in any form or transmitted by any means without prior permission in writing from Standards Australia. Permission may be conditional on an appropriate royalty payment. Requests for permission and information on commercial software royalties should be directed to the head office of Standards Australia.

Standards Australia will permit up to 10 percent of the technical content pages of a Standard to be copied for use exclusively in-house by purchasers of the Standard without payment of a royalty or advice to Standards Australia.

Standards Australia will also permit the inclusion of its copyright material in computer software programs for no royalty payment provided such programs are used exclusively in-house by the creators of the programs.

Care should be taken to ensure that material used is from the current edition of the Standard and that it is updated whenever the Standard is amended or revised. The number and date of the Standard should therefore be clearly identified.

The use of material in print form or in computer software programs to be used commercially, with or without payment, or in commercial contracts is subject to the payment of a royalty. This policy may be varied by Standards Australia at any time.

STANDARDS AUSTRALIA

Australian Standard
Automatic fire sprinkler systems

Part 10: Approval documentation

SECTION 1 SCOPE AND GENERAL

1.1 SCOPE This Standard specifies requirements for the information to be provided for the approval of standard fire sprinkler systems in accordance with AS 2118.1 and automatic wall wetting sprinkler (Drencher) systems in accordance with AS 2118.2.

1.2 APPLICATION This Standard is intended for use by the specifiers, designers and installers of fire sprinkler and wall wetting sprinkler (Drencher) systems.

1.3 NEW DESIGNS AND INNOVATIONS Any alternative materials, designs, methods of assembly, and procedures, that do not comply with specific requirements of this Standard, or are not mentioned in it, but that give equivalent results to those specified are not necessarily prohibited. Advice on such matters can be sought from Standards Australia, but the specified approval remains the prerogative of the regulatory authority.

1.4 REFERENCED AND RELATED DOCUMENTS The following documents are referred to in this Standard:

AS

2118 Automatic fire sprinkler systems

2118.1 Part 1: Standard

2118.2 Part 2: Wall wetting sprinkler (Drencher)

2484 Fire—Glossary of Terms

2484.1 Part 1: Fire tests

2484.2 Part 2: Fire protection and firefighting equipment

3500 National Plumbing and Drainage Code

3500.0 Part 0: Glossary of Terms

2941 Fixed fire protection installations—Pumpset systems

1.5 DEFINITIONS For the purpose of this Standard, the definitions given in AS 2484.1, AS 2484.2, AS 3500.0, AS 2118.1, AS 2118.2, and that below, apply.

1.5.1 Regulatory authority—a Minister of the Crown, a government department, or other public authority having power to issue regulations, orders, or other instructions in respect of any subject covered by this Standard.
